Invitation to the Symposium

„20 Years of Central Reporting and Evaluation Office for Major Accidents and Incidents in Process Engineering Facilities (ZEMA)“

on 21/11/2013

Bundesumweltministerium

Robert-Schuman-Platz 3

53175 Bonn, Germany

Simultaneous translation English / German

Information for event

Ladies and Gentlemen,

after 20 years incident detection and evaluation, it is time to consider whether we achieved the targeted standards with our ZEMA supply of services. Furthermore, it is our goal to adapt the ZEMA to the current needs and expectations of our users. In addition to the information on major accidents, we would like to discuss the possibility to include information on incidents in the ZEMA.

Therefore, we would like to invite you to our symposium.

To make it an opportunity to learn from each other and to intensify our cooperation international experts, who host similar information systems to our ZEMA, are invited to present their information systems.

A first draft program can be found on the next page. We would welcome your participation.

Simultaneous translation English / German

Draft programme
